Safari

Safari is a top grain leather with even coloration throughout and is hand selected from a superior selection of cattle hides. Gentle buffing and grain enhancement is applied to provide a consistent grain structure and is recognized industry wide for its clean surfaces and excellent cutting yields. A soft hand combined with superior technical specifications make this leather suitable for public and private environments.

REACH (EC 1907/2006) compliant production aims to improve the protection of human and environmental health. Processed using low emission mineral tanning formulas which are environmentally respectful, the hides are retanned in aged oak drums using vegetable agents, natural fat liquors, oils and dyes that ensure the leather is properly through dyed. Natural color variations may occur even within the same dye lot.
