

Sula Wood Tables

Design by Allermuir Design Studio

An evolution of the Sula Collection, Sula Wood introduces wood finish options and a new cylindrical base shape to the range. Available in a broad scope of sizes and natural material finishes, Sula Wood works

across coffee, dining, and meeting applications. This expansion adds depth and sophistication to the family, while maintaining the architectural character of the original collection.

Summary of Grain Depth and Structure for Premium Color TFLs

Band 3 TFLs are part of Egger's Feelwood range, characterised by a deeper and more pronounced grain structure compared to standard TFLs. To manage this depth and prevent damage to the decorative paper, Feelwood decors incorporate additional barrier layers. This construction enhances impact resistance, bending strength, and durability.

What makes the Feelwood Premium Color TFL different?

The deeper texture in Feelwood decors is synchronized with the visual pattern, creating a highly realistic wood effect. This design also results in a slight thickness increase of approximately 0.6mm.

These features distinguish Feelwood products from standard TFLs, offering superior durability and enhanced aesthetic appeal as a unique selling point.

Due to the more pronounced grain structure, Band 3 TFLs may not be ideal where a smoother finish is required.

Samples can be ordered through our GroupPortal or by contacting customer service.

Contrasting Edge Tapes

3D Ply
Effect
Edging

All MFCs are available with matching edge tape as standard (TE).
Contrasting edge tape can be specified.

Global Laminates
