

## Mollie Wood - A685

Design by John Colman

29.92 27 813.38 99.00

Whilst these new variants of our hugely successful Mollie chair retain the classic silhouette of the original design they provide a more luxurious sit.

Featuring a deeper fuller back support and a slightly more generous seat width. In addition to the four leg and swivel base from the original a new wooden four leg variant is available.

## **Product Summary**

#### Scope of Assesment:

From extraction of raw materials through to production of the final Office Furniture unit (cradle to gate). See page 2 for more details.

#### Data Used:

Primary data was used wherever possible including for energy use during the core module.

All secondary data was obtained from the Ecolnvent database. used in conjunction with SimaPro 7.3.2, using US, European and global data where relevant.

#### **Functional Unit:**

A Seating solution designed and manufactured to last 10 years.

#### **Regional Market:**

The primary market for our Office Furniture products is USA. The scope of this declaration reflects that.

**Environmental Summary** 

## **Material Declaration**

Material	Amount (kg)	Total (%)	Global Warming Potential ( Kg Co2 Eq):	
Aluminum castings	1.16	13.39	Recycled Content (% By Weight):	
Steel	1.88	21.72	Total Energy Consumption ( Mj):	8
Plywood	2.57	29.62	Recyclability (% By Weight):	
Solid wood	1.28	14.72		
Polypropylene	0.09	1.07	Date of Production: April 2016	
PVC	0.04	0.5		
PU foam	1.13	12.98		
Fabric	0.52	6		

### **Environmental Product Analysis**

This Environmental Product Analysis has been created in accordance with, and following the principles of ISO14025 and ISO14044. All the Life Cycle Analysis data has been compiled, processed and verified by Oakdene Hollins Ltd.

D. Stund

Compilation and processing of LCA data performed by Dr. Dan Skinner (Oakdene Hollins Ltd.)

A. Chymn

Verification of LCA and environmental data performed by Dr. Adrian Chapman (Oakdene Hollins Ltd.)

### Sustain

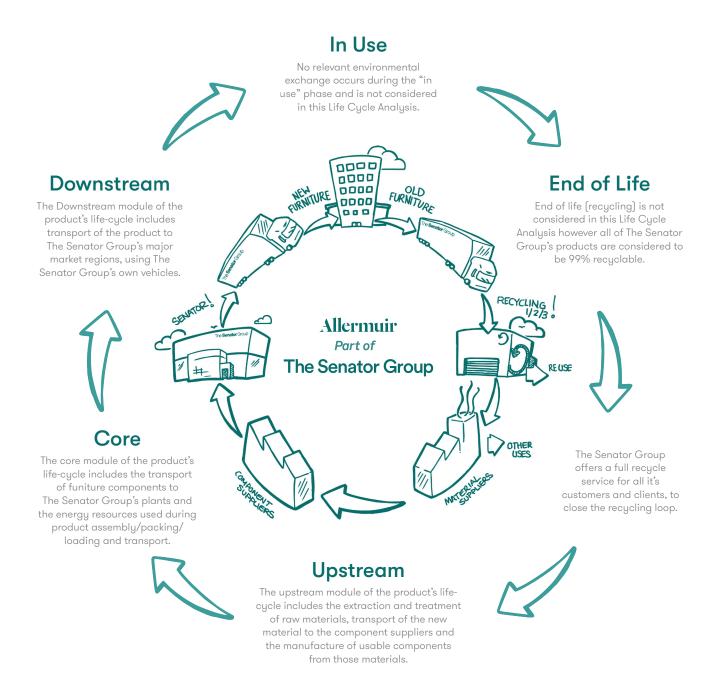

The Senator Group has for many years acknowledged that the key word upon which to focus our attention is Sustainability rather than Recyclability in pure isolation.

Our business takes a truly holistic approach to the design, manufacture, supply and reclamation of our products. We see this as a cyclical process.

From design to manufacture, use and reclamation we aspire to minimise all environmental impacts of The Senator Group's products and processes.

We harvest the resources back from the retired products then remanufacture or reintroduce the materials into our component manufacturers supply chain.

We believe in taking responsibility for our own actions ourselves, wherever possible, rather than relying on third parties, or abdicating our responsibilities by offsetting. The process of Sustainability is a cyclical one we understand this and we actively pursue this in everything that we do.

Sustamusmitg

Certified 2006

Health & Safety Standard

Certified 2015

All UK manufacturing Sites are accredited to ISO standards, 9001, 14001 and 18001. In addition to this the Global Headquarters is also accredited to Chain of Custody. We can provide FSC @ certified products upon request

# FISP (Furniture Industry Sustainability Program)

Awarded by FIRA, this sustainability certificate is designed to monitor all sustainability aspects of a company's facilities and operations. The Senator Group achieved one of the first sustainability certifications within the furniture industry – a public declaration of our commitment to improving our performance in every possible way.

#### Environmental Management

From extraction of raw materials through to production of the final Office Furniture unit (cradle to gate). See page 2 for more details.

# Chain of Custody

Independent certification to prove The Senator Group only purchases MFC/MDF/Chipboard from manufacturers who can prove they purchase their raw wood from sustainable sources.

## The Three R's

The Senator Group is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle—

## Reduce, Reuse and Recycle.

While recycling is the element which receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to Reduce usage. Then we should look to Reuse wherever possible and finally, only after these two processes have been exhausted, should we consider Recycling.

## **Assessment Considerations**

The following necessary assumptions and considerations were made during the course of the Life-Cycle Analysis:

- Manufacture of the furniture components was assumed to take place in the same factory in which the raw materials were processed, due to a lack of case-specific data.
- The transport of all materials, components and finished products was assumed to be via 16-32t Euro 6 lorries.
- All LCA data was modelled using the IMPACT 2002+ (v2.06) method.
